

FUM Grant Summary Report
Team 3134
Cass Lake Bena

Our goal was to spread awareness of FIRST robotics to traditionally underrepresented populations. By accepting our invite and attending the AISES (American Indian Science and Engineering Society) conference in Palm Springs, we were able to interact with over 2,700 attendees in our interactive booth.

The grant funds were used to help defray costs to the team and make this trip financially possible.

Our students were able to interact with other students from around the country as well as leaders in industry and government. Great connections were made by staff and students who attended the trip. For many of the students just the experience of flying across the country to a different state was a big adventure.

If we are invited in the future, our teams would like to attend again as it was a fantastic avenue to spread the word of FIRST and a great opportunity for our students to interact with a variety of different people.

Thank you for your support!
Jesse Frost
FRC teams 3134 & 3275
